## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, and 17-45, drawn to a cleaning device of a powder coating booth.

Group II, claim(s) 46-52, drawn to a method for cleaning a powder coating booth.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Based on a general search performed by the examiner, there exists a cleaning device having workpieces be conveyed in a booth and sprayed (or coated) with solid (i.e. powder) via nozzles attached to a powder source by pipes [see, for example Abstract and col. 1, lines 48-62 – Bowers (U.S. Patent 5,766,061) in view of Adams et al. (U.S. Patent 5,680,670) – Abstract and drawings. Adams et al. teaches the nozzles ejecting a medium onto the walls of the powder coating compartment (i.e. booth) to clean the interior of the booth after its use].
